WEATHER REPORT

The weather in April in Olympia is typical "spring" weather for much of western Washington. You can probably expect cool temperatures, averaging between 40 and 60 degrees with some rain in the forecast. It's a good idea to bring rain gear, especially if you are participating in any of the hunting events. We will hope for sunny weather, and do our best to arrange it, but plan for a little rain "just in case"!

Welcome!

Welcome to the 2011 Spinone Club of America National Specialty. We have many activities planned for the week: specialties, obedience and rally trials, hunting events, and more. This year we are offering seminars and clinics on hunting, health, and conformation, as well as fun events like the Spinone Olympics. It is going to be a busy and fun-filled week, so put together a plan of attack to get in everything that interests you.

We will be gathering on the West Coast for the first time in SCOA's 24-year history, to enjoy the camaraderie of fellow Spinone lovers and to celebrate the heritage of the Spinone Italiano as a versatile hunting dog and companion.

I'd like to thank the many people who have worked so hard to make this event possible. Every one of these people has played an important part, most of them more than one part, in putting this all together. Taking on a project such as this is a huge undertaking. Please, when you see any of these people at the meeting, give them a big thank you for all of their hard work. They all did this so you, your family and your dogs could enjoy a great week with other Spinone enthusiasts.

We have implemented new awards for members who successfully qualify their dog or dogs at the National Specialty. The awards are gold and silver medallions with the SCOA logo, for class placements and qualifying scores.

I would be remiss if I did not take the time to thank my fellow Board members for all their time and hard work to get the Spinone Club moving forward. I would also like to thank all the volunteers that have worked on committees to assist the Board in working to protect and advance the interest of this wonderful breed.

We are brought together by the love of this unique and wonderful breed, but even when we say it's "all about the dogs," we usually find it's also "all about the people." We invite you to come for the whole week of planned events to enjoy the activities, meet old friends and make new ones. Have a safe and enjoyable trip—I hope you will find the entire week worthwhile, fun and educational. Have a great time at the 2011 Spinone Club of America National Specialty!

SEMINAR: THYROID DISEASE, VACCINE ISSUES, & NUTRITION
Speaker: Dr. W. Jean Dodds, DVM

Dr. Dodds received her D.V.M. degree with honors in 1964 from the Ontario Veterinary College, University of Toronto. In 1965 she accepted a position with the New York State Health Department

in Albany and began comparative studies of animals with inherited and acquired bleeding diseases. In 1980 she also became Executive Director, New York State Council on Human Blood and Transfusion Services. This work continued until 1986 when she moved to Southern California to establish Hemopet, the first nonprofit national blood bank program for animals. She has been a member of many national and international committees on hematology, animal models of human disease, veterinary medicine, and laboratory animal science. Dr. Dodds has over 150 research publications and is an inventor on numerous patents.

Her Seminar will include the following key elements:

- Hypothyroidism is the most common endocrine disorder of dogs, and up to 90% of cases result from an autoimmune disease that progressively destroys the thyroid gland (autoimmune thyroiditis).
- The challenge to produce effective and safe vaccines for the prevalent infectious diseases of animals has become increasingly difficult. In veterinary medicine, evidence implicating vaccines in triggering immune-mediated and other chronic disorders (vaccinosis) is compelling.
- Wholesome nutrition is key to maintaining healthy immune function and resistance to disease. Discussion will focus on the basic ingredients and trace vitamins, minerals, and immune-balancing nutrients that promote healthy endocrine and immune function as they apply to health and disease.
